Kenya

### SUMMARY

---

Dedicated and friendly junior software developer aspiring to get into entry level roles. Keen to utilize my problem-solving skills to create practical solutions, software or otherwise, with a heavy emphasis on great user experience.

### SKILLS

- React JS
- Angular JS
- Node (Express) JS
- JavaScript
- HTML/CSS

### Projects

---

#### Job Applications Site - [Link to the live site](#)

This is a Job application site inspired by the popular upwork freelancing platform. I really got to cement my fundamental knowledge, and got to expose new knowledge gaps in the advanced concepts of react.

#### Student Portal - [Project github link](#)

This is a student portal website. It is my first full stack application that uses ReactJS for the front end and Sinatra(Ruby web framework) for the backend. I plan to add more functionalities to make it a mobile-responsive, feature-rich website .

### EXPERIENCE

---

#### IT attache | Nakuru County Government

May 2022 - June 2022 | Nakuru

- Troubleshoot the local area network, and come up with solutions to any issues found.
- Conducted staff training on computer security best practices such as using strong passwords.
- Adding computers to the local area network.
- Performing software installation and upgrades.

## EDUCATION

---
